

PARKING AT THE MALCOLM BALL FIELD

Parking on NW 105th street between the bridge and the ball field gate is **prohibited**. There are numerous No Parking signs on both sides of the road, please respect those signs.

You *may* park along the sides of W. McKelvie Road (the east-west road that comes into the field) but please get to the side as much as possible so farm equipment and rescue vehicles can get through.

The BEST place to park is in the lot behind the right field fence. There is ample parking back there. You may also park in the field to the south of the ball field. That is the home to our future ball fields and you may park there. **BEWARE** - *it is a farm field so park there only if you're comfortable driving in and out of a field.*

You can also park along the south edge of the property along the fence as well as behind the concessions stand building. Parking behind the bleachers and along the north edge of the main drive is discouraged as that is foul ball danger area and it creates a tremendous amount of congestion. Backing up and getting out will be treacherous.

Thank you in advance for respecting our parking areas.
